

# A Competency Framework for Rheumatology Nurses: Advanced Level Practitioner

This document should be used in conjunction with the first edition of the RCN's Competency Framework for Rheumatology Nurses (2020) as guidance, this includes advice on the assessment process and on providing evidence. The competency framework is available at: [www.rcn.org.uk/professional-development/publications/pub-009004](http://www.rcn.org.uk/professional-development/publications/pub-009004)

Level of competency attainment guidance	Level
Cannot perform/demonstrate this activity satisfactorily or participate in the clinical environment	1
Can perform/demonstrate this activity but not without constant supervision and assistance	2
Can perform/demonstrate this activity with some supervision or assistance – and in clinical settings discussing cases as needed	3
Can perform without supervision or assistance demonstrating more than acceptable speed and quality showing initiative and adaptability to special problem situations – and in clinical settings discussing only difficult cases	4
Can perform without supervision or assistance demonstrating more than acceptable speed and quality showing initiative and adaptability to special problem situations and can lead others in undertaking this activity – and in clinical settings bringing pertinent cases to MDT meetings or appropriate clinician as required	5

# A Competency Framework for Rheumatology Nurses: Advanced Level Practitioner

y

Competency 1: Specialism knowledge				
Performance criteria	Evidence	Level achieved	Date	Assessor/self-assessed
Knowledge and understanding				
Has undertaken specialist qualification at advanced level.				
Understands the individual and national health burden of rheumatological conditions and how this impacts patients and services.				
Understands the diagnostic criteria, aetiology, biology and pathophysiology of MSK and rheumatological conditions, co-morbidities, and differential diagnoses and risk factors, including complex autoimmune connective tissue diseases, vasculitis, rare metabolic bone disease or inherited connective tissue disease and treatment pathways.				
Understands the main classifications of drug therapy including analgesia, non-steroidal anti-inflammatory drugs (NSAIDs), disease modifying anti-rheumatic drugs (DMARDs), immune modulatory drugs and corticosteroids.				
Understands treatment pathways including Treat to Target, self-management strategies, and national standards.				
Understands the difference between paediatric and adult onset disease and what happens to their disease through a lifetime course.				
Understands the impact of combination therapies, increases in dosage and the risks related to immunosuppression (especially in CYP).				
Understands the risk factors for prolonged corticosteroid use and impact upon children and young people's growth, weight, skin and pubertal development.				
Understands the differences between delivery of care in a paediatric, adolescent, young person and adult care setting.				

# A Competency Framework for Rheumatology Nurses: Advanced Level Practitioner

y

Understands the red flags indicating uveitis in a young child and the importance of screening and regular review for evidence of uveitis in children.				
Understands bone health, including the importance of diet, vitamin D, micronutrients, exercise and associated risk factors and their importance within the rheumatology context including child development (where appropriate).				
Understands falls and fracture risk in rheumatology patients and can explain these to patients and carers.				
Understands normal, osteopenia and osteoporosis dual energy-ray absorptiometry (DXA) results, and resulting treatment options.				

# A Competency Framework for Rheumatology Nurses: Advanced Level Practitioner

y

Drives person-centred care in relation to the specific health care needs of the local population of patients with rheumatological conditions served by the organisation.				
Discusses the principles of rheumatology nursing practice and explains how care is organised throughout the patient journey to colleagues and people with rheumatological conditions and their carers.				
Actively develops the practice of others on all aspects of rheumatological conditions and associated co-morbidities.				
Contributes to development of effective treatment pathways and teaching programmes on all aspects of Rheumatological treatment pathways, and national standards.				
Is able to discuss the individual and national health burden of rheumatological conditions and how this impacts services.				
Identifies and acts on DXA results and requests other relevant tests to exclude diseases that can present with osteoporosis and vertebral fracture.				
Offers advice and educates colleagues and patients with rheumatological conditions and carers about the significance of bone health, vertebral fractures and approaches to fracture risk reduction in at risk rheumatology patients and monitors the effectiveness of treatments.				

# A Competency Framework for Rheumatology Nurses: Advanced Level Practitioner

y

Holds IR(ME)R certification and relevant training for investigation of more comprehensive clinical findings where appropriate according to local policy.				
Knowledge of the non-MSK manifestations of rheumatological pathologies.				
Knowledge of the potential psychological and social implications of living with a rheumatological condition.				
Understands falls risk implications and the importance of assessment.				
<b>Skills and behaviours</b>	<b>Evidence</b>	<b>Level achieved</b>	<b>Date</b>	<b>Assessor/self-assessed</b>
Monitors specialist infection control compliance and adheres to policies and national guidelines.				
Carries out comprehensive MSK and rheumatology assessments; including multisystem assessments, interpreting and acting on findings.				
Develops effective use of selective questioning and gauging responses (consultation skills) to achieve accurate assessment.				
Requests investigations appropriately and recognises unexpected findings and reports these appropriately.				
Applies knowledge of normal body mechanics and Includes additional physical examination to further understand the impact of the patient's diagnosis.				
Initiates shared decision making in partnership with the patient based on experience and expertise to achieve the best outcome.				

# A Competency Framework for Rheumatology Nurses: Advanced Level Practitioner

y

Audits effectiveness of referral pathways and works with MDT where changes in practice are required.				
Proactively identifies adult and child safeguarding issues and liaises appropriately with relevant agencies.				
Uses age appropriate language and scoring and measurement tools relevant to disease monitoring, including parent/carer where appropriate.				
Contributes to Child in Need plans, team around the family and child protection conferences.				
Support progression through age appropriate care from paediatric to adult care.				
Initiates falls and fracture risk assessment referral.				

# A Competency Framework for Rheumatology Nurses: Advanced Level Practitioner

y

Skills and behaviours	Evidence	Level achieved	Date	Assessor/self-assessed
Undertakes risk assessment and capacity assessment of patient and carers and educates staff about this.				
Advises where further assessment of capacity is necessary and seeks advice when needed.				
Able to support patient and family to select most appropriate medication and administration of medication and provides support for ongoing self-management and assesses treatment concordance.				
Educates staff, patients and carers regarding ng nnrend cars				

# A Competency Framework for Rheumatology Nurses: Advanced Level Practitioner

y

Competent to administer specialist prescribed treatments.				
Safely administers Entonox for procedures as per local policies.				
Audits prescribing practice against national guidance.				
Demonstrates safe and accurate joint aspiration and joint injection.				
Develops effective treatment pathways to support patients who are corticosteroid dependant.				
Develops strategies which could be implemented to improve concordance.				
Provision of information to other agencies where appropriate to ensure reasonable adjustments to support the patient.				
Co-ordinates multidisciplinary patient management and follow up and develops collaborative working practices.				
Supports the prescribing and monitoring of medication when delivered in another health care setting or within a clinical network.				
Identifies patients at risk or in need of advice or referral regarding misuse of drugs or over prescription.				
Identifies and refers patients to other therapies and services working collaboratively to enhance service delivery and patient outcomes.				

# A Competency Framework for Rheumatology Nurses: Advanced Level Practitioner

y

Competency 4: Communication				
Performance criteria	Evidence	Level achieved	Date	Assessor/self-assessed
<b>Knowledge and understanding</b>				
Understands factors effecting self-management and evidence-based approaches to patient education.				
Understands of national guidance documents within the scope of rheumatology to support safe practice.				
Has the knowledge to access specific tools to aid rheumatological assessment.				
Understands national guidance documents within the scope of rheumatology to support safe practice.				
Considers appropriate alternative ways that care can be delivered to improve patient experience with a rheumatological condition ensuring communication needs are enhanced.				
<b>Skills and behaviours</b>	<b>Evidence</b>	<b>Level achieved</b>	<b>Date</b>	<b>Assessor/self-assessed</b>
Utilises shared decision-making goal setting and action planning and obtains patient's lay beliefs to enhance concordance.				
Describes approaches to diagnosis, treatments and ongoing monitoring to patients and their carers.				
Ensures accurate information is provided to patients, carers and families when starting treatment to support safe medication administration, in a developmentallme

y

Ensures information regarding rheumatology and home care delivery services and out of hours procedures and access.				
Acts to collaborate and promote drug persistence and adherence.				
Liaises with and maintains professional working relationships with key stakeholders and agencies involved in the care pathway.				
Develops information in partnership with patient representatives, stakeholders and senior managers to ensure information needs are met.				
Monitors delivery of home care supplies of medication and ensures staff and patients are familiar with processes.				
Ensures adequate provision of medication liaising with prescribers as needed.				
Contributes to the development and evaluation of specialist local patient information resources and seeks patient feedback.				
Ensures clear communication routes are used by patients having home care delivery.				
Promotes e-health approaches, telemedicine, care planning and documentation in line with local policies and national guidelines.				
Demonstrates specific skills to undertake telephone consultations.				
Contributes to evidence-based patient education sessions co-ordinating with the MDT for delivery, taking into account the individual needs of patients and carers.				
Supports the delivery of care across a clinical network. Communicates and shares relevant information with other agencies interacting with the child, young person or young adult, including schools and colleges.

y

Skills and behaviours	Evidence	Level achieved	Date	Assessor/self-assessed
Undertakes evaluation of patient experience to improve service delivery.				
Manages clinical caseload safely, effectively and efficiently demonstrating excellent time keeping skills.				
Carries out clinical annual review using local protocol.				
Ensures systems are in place to support patients and carers where necessary.				
Uses quantitative outcome measures to review clinical effectiveness of service provided and performance against contractual requirements.				
Manages service skill mix requirements, supporting team members to ensure core service delivery.				
Manages job planning to ensure appropriate time is allocated to core components of roles.				
Involved in the development of referral pathways into rheumatology service; understands the wider political environment and how this influences service redesign.				

# A Competency Framework for Rheumatology Nurses: Advanced Level Practitioner

y

Ensures robust data collection and adherence to commissioning requirements for high cost drugs.				
Ability to recognise referrals that are inappropriate and use pathways to take action and when to discuss this with referrer.				
Ability to recognise when to seek guidance when making triage decisions.				
Ability to complete relevant funding applications for biologic therapy for adults and CYP.				

# A Competency Framework for Rheumatology Nurses: Advanced Level Practitioner

y

Competency 7: Leadership and development				
Performance criteria	Evidence	Level achieved	Date	Assessor/self-assessed
<b>Knowledge and understanding</b>				
Knowledge of organisational change and leadership models including the characteristics of effective leadership styles, development and succession planning, and concepts associated with vision, strategy, goals and objectives.				
Participates in local and regional or national meetings, contributing to rheumatology development.				
Accesses a foundation level leadership training.				
Understands the importance of specific research methods.				
Understands the nature of projects and deadlines and how these can impact the service.				
<b>Skills and behaviours</b>	<b>Evidence</b>	<b>Level achieved</b>	<b>Date</b>	<b>Assessor/self-assessed</b>
Promotes organisational goals. Understands service and organisation's policies and practices.				
Promotes a positive working environment developing a learning culture which promotes reflective practice.				
Provides clinical supervision. Provides leadership in the implementation of national standards.				
Demonstrates resilience in the workplace and is able to

y

Uses literature searches to access current evidence for clinical practice and takes part in research.				
Uses expert clinical knowledge and leadership skills to operationally influence service change.				
Can mentor staff and appraise as appropriate.				
Manages and oversees delivery of specialist rheumatology services.				
Contributes to specialism education, professional development of students and colleagues in the workplace.				
Can lead a meeting.				
Clearly defines expectations of contributions from the team adapting leadership style to the specific situation ensuring deadlines are met.				
Carries out regular appraisals of staff members.				
Regularly attends professional ftio member S-16.1 (g d)3 (g(o)-1 (s)4.3 (m)18.1 ( e87 (t (s)-15.9 (s)-9.1 (i)-11.9 (o)-17E(u)-13.1 (l)-13.7 (n)-1d)3 (g0g)-19 (e)-15.9 (s a)-19.5 (n)-19.6 (d o)-1)-20.9 (g)-1e)-9.1 (f)-21 (f)2,1 (g l)-15.3
